

InfuTrace™

InfuTrace™ gently complexes formaldehyde destroying its harmful vapors without compromising tissue fixation.

Hazardous Vapors are reduced by up to 95% while fixation and tissue quality is maintained.

- ◆ Significant reduction of formaldehyde & phenol vapors.
- ◆ Reduces the risk of vapor exposure to faculty and students.
- ◆ No More nasty odors, burning or tearing eyes.
- ◆ Will not alter tissue quality, form or structure.
- ◆ Reduces the high cost of enhancing ventilation systems.
- ◆ Reduces potential contamination of computer components.
- ◆ Non-Hazardous tissue transportation, human or animal.

Product # IT-250 Infutrace™ Concentrate in a 2.5 gallon Cubitainer with spigot dispenser
Product # IT-030 Infutrace™ Concentrate in a 30 gallon Tight-Head Drum
Product # IT-055 Infutrace™ Concentrate in a 55 gallon Tight-Head Drum
Product # IT-32E Infutrace™ Empty 32-oz pre-labeled Spray Bottle

Infutrace™ used as a “Secondary Perfusion Solution”, “Point Injection Solution”, “Specimen Dip” or “Spray Solution” for human or animal cadavers, also dip and spray for tissue-parts, organs, or pro-sections. InfuTrace™ contains a mold inhibitor to compliment use with your mold inhibitor moistening agent.
